Manufacturer:
Testi Fratelli
www.testigroup.com

Specifications:
Type of stone: **Moleanos (other materials are available on request)**
Finishes: **honed, milled**
Sizes: **70x70 cm. and 70x50 cm. (wall-floor continuous module and wall-ceiling continuous module available)**
Information: **prices and technical characteristics available upon request (contact Testigroup)**

The *Hyperwave Series* is the result of innovative 3D design and stone manufacturing technologies and represents a customizable line for interior and exterior wall claddings. The design takes inspirations in natural forms and processes which introduce an architecture of experience with smooth tactile stone surfaces. The spatial experience is enriched through the transmittance of sensations performed by the subtly changing color tonalities and by particular light effects that enhance aesthetic motives with emotional qualities. The design *Dunes* is composed of basic modules with the size of 70x70 cm, and 70x50 cm. The single modules allow for an unlimited number of individual compositions to be obtained with different assemblies. Specific edge modules allow continue stone surface cladding from floor to wall to ceiling, combining fluidly horizontal and vertical planes without interruption.
